

Thaicom Launches Free Wi-Fi Onboard with Nok Air: Thaicom PLC led by Mrs. Suphajee Suthumpun, Chairman of the Executive Committee and CEO and Nok Air led by Mr. Patee Sarasin, CEO launched a free in-flight Wi-Fi Onboard Service offering Nok Air's passengers with a 3G-speed connection via Ku-band network for the first time in Asia. At the Private Jet Terminal, Don Mueang International Airport, both Thai and international journalists together with honorable guests had also experienced a VDO streaming from the aircraft to the Conference Room and also a connection while travelling on Nok Bussaracum, the inaugurated aircraft flying between Bangkok and Phuket on September 23, 2014.

The In-Flight Connectivity (IFC) broadband service was developed in accordance with its New Frontiers strategy: New Solutions which is intend to offer the new mobility solution through the satellite network serving sea-air-land connectivity serving the industry and our customers with end-to-end services, enabling the passengers to access to the hi-speed internet while on boarding. Thaicom has cooperated with its partner Global Eagle Entertainment to implement this service to allow the passengers to get access to broadband. Thaicom is confident that the In-Flight Connectivity service will create an added value to Nok Air and more enjoyable experience for its passengers.

###

About Thaicom

Thaicom Public Company Limited, a leading Asian satellite operator, was established in 1991 with unique proposition in providing integrated solutions for satellite broadcast and broadband. The Company houses high profiled engineering teams to provide leading-edge innovative solutions on telecommunication and satellite that answer every need with a full spectrum of services. Until now, Thaicom has launched six satellites into the orbit; three satellites are in operations. THAICOM-5 and THAICOM-6 are a "Hot Bird" broadcasting satellite for Thailand and SE Asia, boarding more than 600 TV channels, coverage over Thailand , SE Asia and Africa (by the name "Africom-1"). THAICOM-4 (IPSTAR) is the world's first broadband satellite and is providing broadband services to 14 countries across Asia-Pacific region. With the unique performance and technology of THAICOM-4, the Company has

provided its solutions to many countries in the region to enable the broadband connectivity everywhere, also to recover communication networks at the time of disasters.

In September 2014, THAICOM-7 was launched in addition to existing satellite while THAICOM-8 has been under the production process which will finally also be launched to the "Hot Bird", 78.5 degrees EAST around the first half of 2016. The new bird will increase more transponders that serve the countries in Asia and Africa.

Thaicom PLC is listed on the Stock Exchange of Thailand (SET) under the trade symbol "THCOM".

About THAICOM-7

THAICOM-7 built by Orbital Sciences Corporation of U.S.A. There are 14 C-Band transponders in total, covering South Asia, Southeast Asia, Australia and New Zealand. THAICOM-7 was launched into the 120 degrees East in September 7, 2014 conveyed by Space Exploration Technologies Corporation (SPACE X)'s Falcon 9 of USA. This will create the economic opportunity of Thailand and expand the competency of the company to provide telecommunication services as well as respond to the customer demand within the servicing area.

About THAICOM-8

THAICOM-8 will have a total of 24 Ku-Band transponders, covering Thailand, South Asia and Africa. THAICOM- 8 will serve customers' needs for increased Ku-band capacity and also strengthen THAICOM's Hot Bird platform at 78.5 Degrees East. Orbital Sciences Corporation will be the manufacturer of the satellite and Space Exploration Technologies Corporation (SPACE X) will be the launcher of the satellite.
