

Environmental Policy

Thaicom Public Company Limited (the company) emphasizes the importance of growing business sustainably with the responsibility towards the environment, community, and society, built on a foundation of good governance in partnership with stakeholders. The company realizes that its business operations may directly and indirectly affect the environment. Therefore the company is committed to managing its environmental impact to reduce risk, increase business opportunities, and ensure a good environment for the next generation.

The company has established this environmental policy as a guideline for the company's business operations to promote the reduction of negative environmental impacts and to drive efficient and effective environmental management.

1. The company will comply with all applicable environmental laws and regulations as well as related environmental standards.
2. The company will minimize negative impacts on the environment by reducing waste and preventing pollution caused by the company's activities.
3. The company will effectively manage limited resources and energy consumption.
4. The company will prevent and mitigate greenhouse gas emissions effectively.
5. The company will support environmentally friendly products and services.
6. The company will communicate this policy and its implementation to stakeholders.
7. The company will encourage all employees to be aware of and participate in environmental management.

This policy is effective as of October 30th, 2018.
